September 27, 2001

Secretary of Energy Spencer Abraham
1000 Independence Ave SW
Forrestal Bldg 7A-257
Washington, DC 20585

Secretary Abraham:

A decision on Yucca Mountain must be based on sound science. DOE has spent the better part of two decades and \$7 Billion studying Yucca Mountain. These studies have yielded the scientific information necessary for a decision to be made this year.

Public health and safety standards for Yucca Mountain must be based on sound science. Controversy over standards that lack scientific basis, as proposed under the previous administration, should not be permitted to stand in the way of a decision.

I urge you to make used nuclear fuel disposal one of your highest priorities.

Sincerely,

Sharon Thome
